Automation Hub
Overview

Build with Automation Hub

Develop, launch, and manage bots with our no-code platform. Automation Hub is all you need to implement scalable and connected RPA solutions quickly.

Automation Hub makes automation easy with ready-made building blocks, runs unlimited bots, and manages automated workflows in one place. With hundreds of supported applications and numerous GUI/API automation capabilities, the sky is the limit!

400% return on RPA investments for top performers

| Highlights	No-Code Tools	Free Bot Runner	Control Center	Time-to-Value
	Create automated workflows in a snap	Download to run an unlimited number of bots	Manage your workflows in one place	Go from dev to production in two clicks

The ElectroNeek Automation Hub is comprised of three key products.

| Studio Pro	Bot Runner	SaaS Orchestrator
• Record up to 10 UI elements at a time to speed up automation workflow creation	• Deploy bots within a secure framework or environment - no internet connection is required	• Deploy bots to SaaS Orchestrator right from your development environment in two clicks
• Build automation workflows easily with no-code tools	• Launch your .neex files and run a bot within seconds	• Combine bots into complex sequences to tackle the most ambitious tasks
• Replicate any user actions across desktops and browsers	• Bots don't collect or store more data than needed - credentials granted are stored locally with Windows Credential Manager	• Easily connect bots with the rest of your infrastructure
• Dozens of platform and application integrations to cover virtually any client environment	• Use Bot Runner for free and deploy unlimited RPA bots	• Comprehensive dashboards enable real-time monitoring of automated workflows

No-code automation in a snap!

With powerful automation tools, quickly and easily create sophisticated solutions for your clients that save time and money. Build your RPA expertise with our turnkey platform to run your automation business.

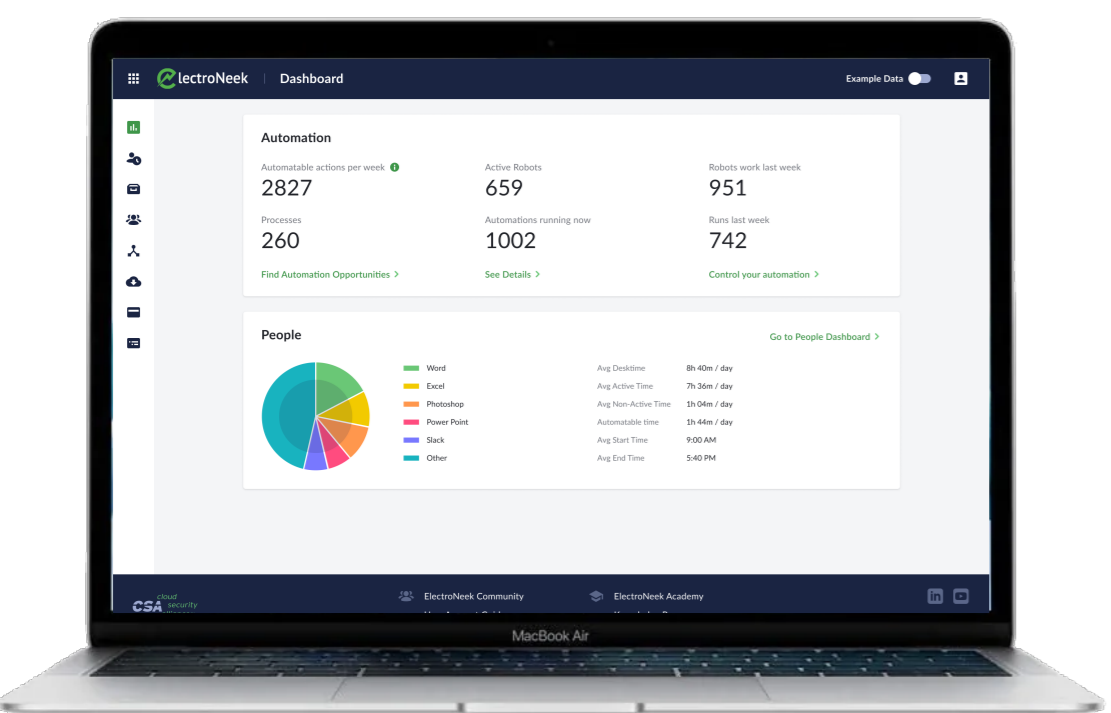

Studio Pro

ElectroNeek's intuitive development environment provides you with all the tools you need to automate any task. Set your team up for success with our no-code tools that make it easy to design complex automation sequences.

Bot Runner

Bot Runner is a free-to-download app designed to run an unlimited number of attended and unattended bots for any client. You can even use Bot Runner locally if the activities in the automated workflow don't require an internet connection.

SaaS Orchestrator

SaaS Orchestrator is a cloud-based control room to manage bots, build sequences, and analyze automation performance within any number of client organizations.

> **Thrive Automation recognized a growing demand for automation in traditional ERP and CRM solutions.**
>
> "We realized that the usual per-bot model offered by traditional RPA vendors needed to meet the requirements of SMBs. In my search, I found [out] about ElectroNeek's unique licensing model, and Thrive Automation partnered with ElectroNeek soon after."
>
> **Haadi Ladha, Head of Development, Thrive Automation**
